About

This dataset is from the [WHO Health Inequality Data Repository](#).

This dataset contains national average data related to the determinants of health. The indicators in this dataset align with the indicators in the [WHO Operational Framework for Monitoring Social Determinants of Health Equity](#). This framework proposes a menu of indicators covering six domains with recognized impacts on health: (a) economic security and equality, (b) education, (c) physical environment, (d) social and community context, (e) health behaviors, and (f) health care. Please note that some indicators in the Operational Framework are measured by more than one indicator in this Determinants dataset.

Data source

Data are derived from multiple data sources, including:
- The Sustainable Development Goal (SDG) Global Database (https://unstats.un.org/sdgs/dataportal), using the United Nations Statistics Division SDG API. SDG indicator data originate from custodian agencies responsible for the global monitoring of each indicator, including its definition, data collection and calculation.
- The World Bank Data Catalog (https://data.worldbank.org). Data originate from various sources, detailed in the links to indicator metadata.
- The Organisation for Economic Co-operation and Development (OECD) Data Explorer (https://data-explorer.oecd.org). The OECD collates data from OECD countries and selected non-member economies.
- The WHO Global Health Observatory (https://www.who.int/data/gho).
- The WHO Maternal, Newborn, Child and Adolescent Health and Ageing Data Portal (https://platform.who.int/data/maternal-newborn-child-adolescent-ageing).
- International Institute for Democracy and Electoral Assistance (IDEA) Voter Turnout Database (https://www.idea.int/data-tools/data/voter-turnout-database).
- UN Development Programme (UNDP) Human Development Data (https://hdr.undp.org/data-center).
- UN Office on Drugs and Crime (UNODC) data portal (https://dataunodc.un.org).

Methodology

See the links to the indicator metadata below for information about indicator calculation methodologies.
